CITY OF LOS ANGELES

Hollywood, in common with many other sections of the city, is now receiving electric service from the Municipal Bureau of Power and Light, following the purchase by the city on May 15, 1922, of the Edison distributing system in Los Angeles.

Of the total amount being expended this year by the Department of Public Service for the general improvement of the city's electric system, more than \$3,000,000 are being devoted to the extension and betterment of service in Los Angeles. These improvements are in line with the established policy of the Department of Public Service to give Los Angeles
